

192 ePayer-ID

The only global ID verification solution for internet payment processors

Global age and ID verification

192 ePayer-ID is the only truly global identity verification solution for internet payment processors and payment service providers

Whether your merchants are in the retail, gaming or financial services sectors, by integrating 192 ePayer-ID, you can help them transact with more customers online without compromising on security.

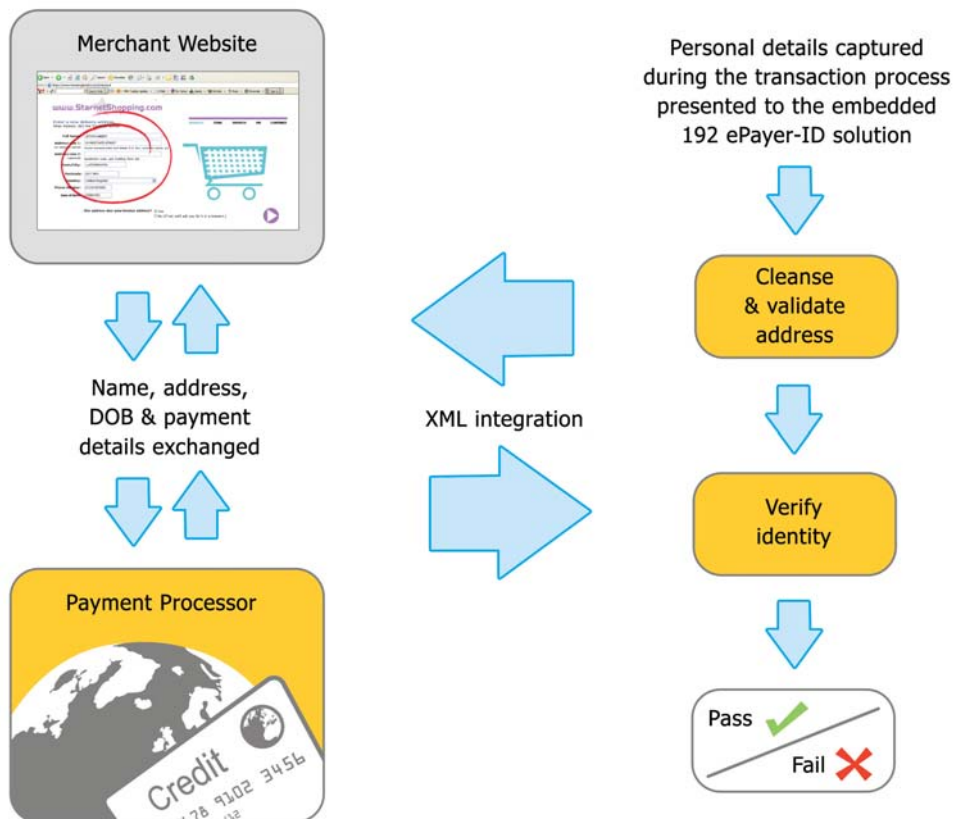

Integrate 192 ePayer-ID into your international services, to help your merchants with:

- Anti-money laundering compliance
- Reduced risk of fraud and exposure to chargebacks
- Age verification for restricted products

Fast integration into your service offering

The unique two-tiered verification approach used in 192 ePayer-ID delivers more than just the most advanced and only global address verification solution. It also means you will be offering the highest level of match rates for your anti money-laundering and fraud checks. After all, it's not just about business protection, it's also about ensuring that legitimate customers are not rejected incorrectly.

As a truly global, online solution, 192 ePayer-ID integrates seamlessly into your payment process via XML. Using data already supplied by the end customer in the registration or purchase process, you can quickly start offering the option of age and identity verification services to your online merchants.

How does 192 ePayer-ID work?

192 ePayer-ID seamlessly checks personal details from the payment process across multiple databases and technologies. The formulation of the verification is highly scalable and customisable, largely dependent on the level of risk and volumes of your merchant's transactions.

192 ePayer-ID is a purely online solution available via XML for seamless integration into your services, or accessible via a web-browser as a back office tool. This means that your business and your customers are always accessing the very latest data available.

Our relationships with key data and technology suppliers across the globe, including government bodies and commercial operations, help us deliver a uniquely global solution with unparalleled breadth and depth of data.

	Address Check <small>(e.g. verify or append postcode)</small>	Name & Address Check <small>(e.g. Directory Enquiries)</small>	Voice-Based Check <small>(e.g. automated call-back)</small>	DOB Document Check <small>(e.g. Passport or Drivers Licence)</small>	DOB Database Check <small>(e.g. credit files)</small>

*For Canada and Australia, Name & Address Check also available.

The only truly global identity verification solution

As eCommerce has become serious business, so too has online fraud.

To ensure that your business and that of your customers is protected in cyberspace, talk to us today about identity verification that will do more than just save you money.

“

“The high match rates we're seeing with VYC (Verify your Customer) translate into significant cost savings for our merchants. It is easy to integrate, adds less than two seconds to our authorisation time and is effective in preventing ID theft and under-aged customers”.

Scott Law, Managing Director, Metacharge
